

# MATCHPOINT USA<sup>TM</sup>

## UNIVERSAL CARRY BACKER

PATENT PENDING

Infinitely Customizable  
Multiple Carry Positions  
Propriety High Tech Polymer  
Completely Ambidextrous  
Proudly Made in the USA

## ONE BACKING PLATE THOUSANDS OF COMPONENTS

The **100% Modular IWB Carry Backer from MatchPoint USA** is the most comfortable, durable, and hygienic concealed carry backer on the market. The mesh grid allows sweat-proof breathability along with a variety of angles to mount your firearm and accessories.

## UNPARALLELED VERSATILITY

In the past most IWB carry backers were made for a single holster, MatchPoint USA has changed all of this. A revolution in concealed carry, the Universal Carry Backer can hold just about any half shell holster in the world in any carry position for both left and right handers.

## A BETTER WAY TO CARRY

The Universal Carry Backer eliminates multiple problems associated with leather and textile holsters. The biggest benefit for concealed carry is the absolute lack of tell-tale printing that alerts the presence of your firearm to others. Deformation that is often seen in leather and textile holsters has also been addressed, no more breaking in your holster or wearing it out. The Universal Carry Backer will not break, warp, deform, or sag .

Our incredibly strong, lightweight Comfortuf 850 material is tough enough to give you a secure fit, while also being flexible enough to form to your body, giving you all day comfort. The mesh pattern allows a variety of accessories to be attached to the backing plate while also providing airflow, taming foul odors and perspiration.

The Universal Carry Backer from Matchpoint USA is a revolution in IWB carry, you owe it to test one today. To find out more visit us online at [matchpointusa.com](http://matchpointusa.com).

# A REVOLUTION IN IWB CARRY

The Universal Backer from Matchpoint USA will change how you buy holsters forever. Thinner, lighter, and stronger than anything else on the market we challenge you to make the comparison. This extremely thin, durable, and flexible concealed carry backer is completely adjustable for all draw positions including FBI Cant, Straight Draw, and Cross Draw. Not to mention it's customizable for carry height, body position, and left & right hand users.

## ONE BACKER ANY HOLSTER

We achieved this by engineering a small amount of flex, letting the backing plate warp to the shape of your shell. You will never need to buy another IWB holster again.

## 100% MODULAR IWB

The Universal Carry Backer is designed from the ground up to be a completely modular system. Our exclusive mesh pattern will fit nearly any holster shell on the market.

The same modular grid will let you rotate your firearm to almost any angle to find the perfect fit for your body shape, not to mention let you carry accessories like a multi-tool, extra magazines, or knife.

Each backer is made with our indestructible patent pending Comfortuf 450 polymer material. This heavy duty material eliminates printing and deformation in IWB holsters. Unlike leather or textiles that can develop unpleasant odors over time; Comfortuf 450 is anti-microbial, won't absorb sweat, and can be easily cleaned with warm water.
